becker-solutions Corp. Opens Sales and Distribution Office in Chesapeake, VA

CHESAPEAKE, VA - becker-solutions Corporation with production facilities in Herdorf, Germany (headquarters) and Shanghai, China has opened its first U.S. subsidiary office. The privately-held company will occupy 3,000 square feet of flex space at the Riverwalk Commerce Center development in the Great Bridge area of Chesapeake. The company plans on creating several new jobs over the next three years.

becker-solutions Corporation is a service provider of high precision turned parts used in the automotive industry throughout the world for U.S. suppliers. The new office in Chesapeake will provide sales, distribution and customer care. Fabian P. Becker, owner and president, will lead the organization. Becker stated, "Being close to our customers is important to us. But more significantly, having a location in Virginia's Hampton Roads will make us a global company."

"The fact that becker-solutions has chosen to locate in Chesapeake validates our efforts to create a world-class business environment for our City, and is a testament to the persistence of the Economic Development Department's hard work," said Chesapeake Mayor Alan Krasnoff. "I always say that Chesapeake is open for business," Krasnoff said, "and that a company with global operations is joining others in our City and basing its American operations here simply underscores that fact."

In October 2007, Chesapeake Economic Development and the Hampton Roads Economic Development Alliance participated in a joint international marketing mission to Germany, which contributed to becker-solutions' decision to locate in Chesapeake.
