**INIT Awarded Contract with Community Transit in Everett, Washington
ITS Contract for Entire Fleet**

Chesapeake/Everett, April 7, 2008 - INIT Innovations in Transportation, Inc. was recently awarded a major contract with Community Transit in Everett, Washington. INIT will provide their JAVA-based CAD/AVL software for 337 of Community Transits' Fixed Route vehicles and 55 Paratransit vehicles. Community Transit will also utilize INIT's onboard computer, COPILOTtouch, as well as other INIT technologies including: onboard next stop displays and announcements with MP3 Voice data center for audio recording, automatic passenger counting system, statistics software for reporting, wireless LAN and real-time passenger information.

The project will be implemented along with an upgrade to a digital 700 MHz radio system including infrastructure and mobile units. In addition, INIT will provide an interface to the destination signs, traffic signal priority system, fare boxes and Paratransit Scheduling Software. INIT's state-of-the-art technology will support Community Transit's daily operations and provide powerful tools to help manage their vehicle fleet.

The \$10.4 million dollar project is scheduled to begin April 2008 with completion projected in the spring of 2010.

About Community Transit

Community Transit operates 64 bus routes in the Seattle metropolitan area and serves more than 2,100 stops, including 20 park and ride lots. In 2007, Community Transit provided 10.9 million passenger rides. www.communitytransit.org
